

## Student Readiness to Return from Medical Leave of Absence

### Instructions

Dear Health Care Provider: LMU requires documentation before a student is permitted to return to campus following a medical leave of absence. This documentation is intended to verify a student's readiness to return to community living and a rigorous academic program, as well as to facilitate conversations with campus resources in order to best support the student's ongoing care and well-being. To support a student's return to campus after a medical leave of absence, this form should be completed by the student's medical or behavioral health care provider. The following questions serve to assess a student's readiness to return to campus.

Answering "no" to any of the questions contained within this document will not necessarily prevent a student from returning to campus. Information about a student's readiness to return will be considered individually by the Student Affairs Dean's Office, based on all documentation provided, provider recommendations, and university policies. Feel free to provide additional commentary as an attachment if needed.
